

QUICK START GUIDE

THIS GUIDE RELATES TO THE FOLLOWING STYLESHEETS:

PRODUCT: OS TERRAIN® 5

DATA FORMAT: SHP

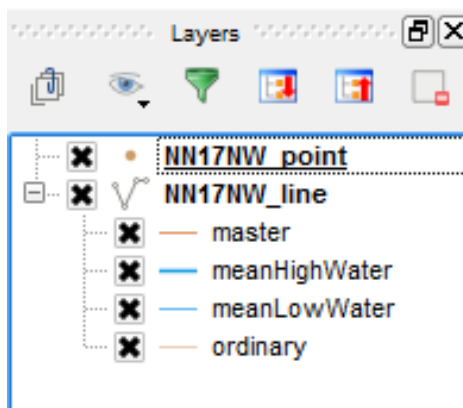

STYLESHEET FORMAT: QGIS STYLESHEETS (QML)

The stylesheets have been designed to work with the data as supplied.

- 1 Either fork the stylesheets on [GitHub](#) or [download](#) them and navigate to the directory that matches your data format, stylesheet format and style preference.
- 2 Open a new, blank map in QGIS.
- 3 Click on the 'Add Vector Layer' button and navigate to the stylesheets folder and the directory that matches your data format, stylesheet format and style preference.
- 4 Select each of the required layers and click 'OK'.
- 5 Double-click on a layer to access the 'Layer Properties' window > click on 'Load Style...' > navigate to the directory containing the QML files (those ending .qml) > select the QML file that corresponds to that layer > click 'Open' > click 'OK'.

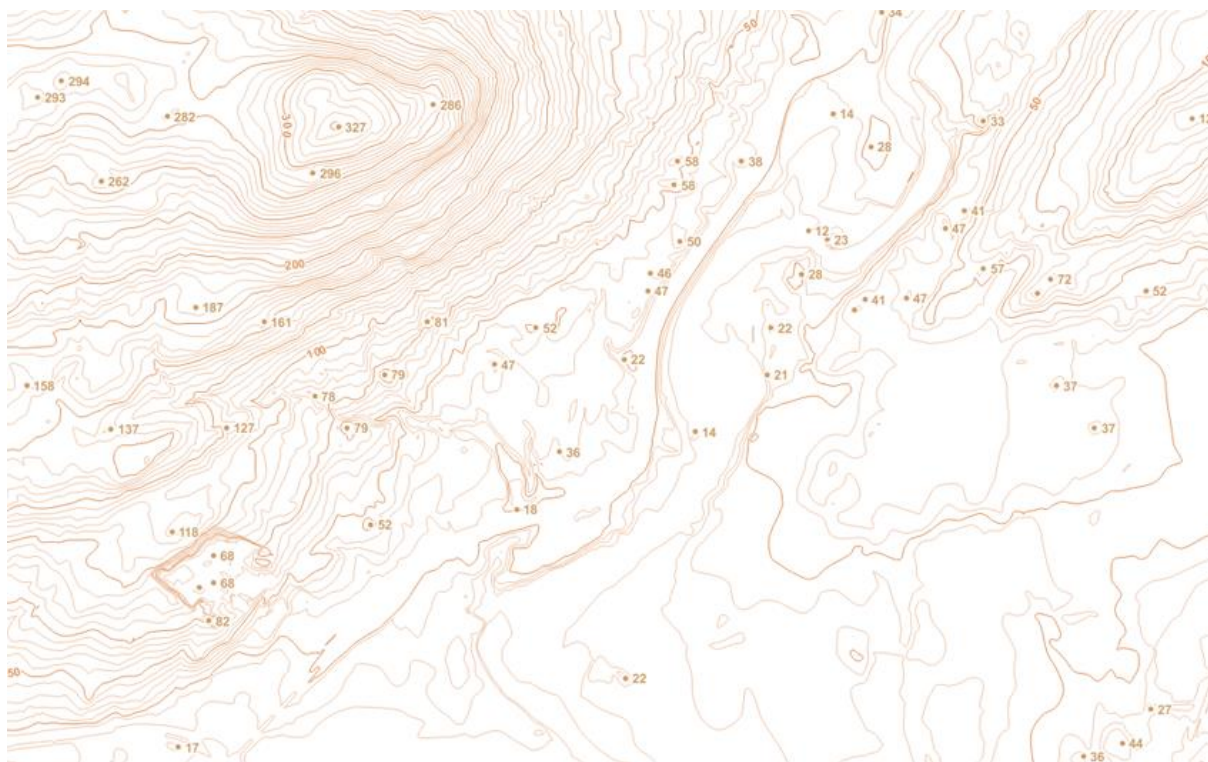

Repeat step 5 for all layers.

- 6 Your Layers panel should now look like below. This is the recommended layer order.

We recommend viewing the map between 1:1 000 and 1:100 000 for maximum legibility.

Your map should now look similar to this:

Compatibility notes

We strive to keep our QML files compatible with the latest long-term release of QGIS.
